SUBJECT INDEX

Actinometer
a chemical actinometer for the wavelength range 610 - 670 nm, 311
Amines
photolysis of CH_4–NH_3–H_2O mixture: formation of methylamine and ethylenediamine, 53
Amino groups
a positive-type photoresist utilizing photoinitiated introduction of pendent amino groups, 269
Ammonia
photolysis of CH_4–NH_3–H_2O mixture: formation of methylamine and ethylenediamine, 53
Anhydrides
quantum yield dependence on the wavelength in the gas phase photolysis of perfluorosuccinic anhydride, 279
Aniline
fluorescence lifetime study of *p*-cyano-*N,N*-dialkylaniline self-complexes in non-polar solvents, 347
Anthracenes
internal heavy-atom effect on the photophysics and photochemistry of 2-styrylanthracene, 137
Anthrancenes
exciplex formation and behavior in the 9,10-dicyanoanthracene–stilbene system, 109
Anthrone
re-examination of the photochemistry of anthrone in solution: evidence for highly reactive self-quenching, 203
Atomic beams
chemiluminescent reactions of some bromine-containing hydrocarbons with samarium under beam–gas conditions, 41

Bichromophoric compounds
bichromophoric compounds as chemical models in the study of the photochemistry of nucleic acids, 167
Bilayers
an investigation of the physical properties of synthetic phospholipid bilayers using a fluorescent quinoline-based probe, 151
Bromine
chemiluminescent reactions of some bromine-containing hydrocarbons with samarium under beam–gas conditions, 41

Carbon dioxide
selective photoreduction of carbon dioxide to methanol with hydrous cuprous oxide, 369
Carboxylates
the interaction between excited β-methylnaphthalene carboxylate and sulphuric acid, 187
Carvone
photoisomerization of carvone: solvent dependence and evaluation for the photochemical storage of light energy, 259
Charge transfer
intramolecular excited charge transfer interaction and triplet formation in N^2-aryl-N^1-anthrylmethylpiperazine, 143
Chemiluminescence
chemiluminescent reactions of some bromine-containing hydrocarbons with samarium under beam–gas conditions, 41
Chloromethanes
the photochemical behaviour of 3-(*N,N*-dimethylamino)-2*H*-1-benzopyran-2-one in tetrachloromethane: the influence of chloromethanes on quenching of fluorescence, 339
Citrate
photodecarboxylation of citrate through ion pair photochemistry: the $Co(Sep)^{3+}$·$citrate^{n-}$ (n = 1,2,3) system, 195
Cobalt
photodecarboxylation of citrate through ion pair photochemistry:

© Elsevier Sequoia/Printed in The Netherlands

the $Co(Sep)^{3+}$·$citrate^{n-}$ (n = 1,2,3) system, 195
Complexes
excited complexes in triethylamine–ethanol at low temperatures: pulse radiolysis study, 325
fluorescence lifetime study of *p*-cyano-*N,N*-dialkylaniline self-complexes in non-polar solvents, 347
Coumarin dyes
dual amplified spontaneous emission from 7-amino-4-methyl coumarin dye, 89
Cuprous oxide
selective photoreduction of carbon dioxide to methanol with hydrous cuprous oxide, 369

Dipyrrylmethene
flash photolysis of mesophenyl-3,4,5,3′,4′,5′-hexamethyldipyrrylmethene, 121

Electron transfer
the energy balance of photoinduced electron transfer reactions, 239
Energy transfer
triplet energy transfer sensitized fluorescence in 3,9-dibromoperylene, 97
ESR
electron spin resonance studies of photoirradiated poly(methyl methacrylate): effect of wavelength on the formation of radical species, 273
Exciplexes
exciplex formation and behavior in the 9,10-dicyanoanthracene–stilbene system, 109
synthesis and exciplex formation of diethyl 2-(9-anthrylmethyl)-2-(*p*-*N,N*-dimethylaminobenzyl)-malonate in a polymer matrix, 387

Guanines
intermediates produced from the room temperature 266 nm laser photolysis of guanines, 219

Heavy-atom effect
internal heavy atom effect on the photophysics and photochemistry of 2-styrylanthracene, 137
Hexamethyldisilane
stationary and pulsed photolysis of hexamethyldisilane, 287

Iodonium salts
time-resolved laser spectroscopy of the sensitized photolysis of iodonium salts, 317
Ion pairs
photodecarboxylation of citrate through ion pair photochemistry: the $Co(Sep)^{3+}$·$citrate^{n-}$ (n = 1,2,3) system, 195

Lignin
a sensitivity analysis of the kinetic mechanism for the photodegradation of a model system of relevance to lignin yellowing, 397
Low temperatures
excited complexes in triethylamine–ethanol at low temperatures: pulse radiolysis study, 325

Malonates
synthesis and exciplex formation of diethyl 2-(9-anthryl-methyl)-2-(*p*-*N,N*-dimethylaminobenzyl)-malonate in a polymer matrix, 387
Methane
photolysis of CH_4–NH_3–H_2O mixture: formation of methylamine and ethylenediamine, 53
Methanol
selective photoreduction of carbon dioxide to methanol with hydrous cuprous oxide, 369

Naphthalene
the interaction between excited β-methylnaphthalene carboxylate and sulphuric acid, 187
Nucleic acids
bichromophoric compounds as chemical models in the study of the photochemistry of nucleic acids, 167

Oligophenylenes
photophysical properties of 1,3,5-tris-(*p*-oligophenylene)-benzenes, 131

Pendent groups
a positive-type photoresist utilizing

photoinitiated introduction of pendent amino groups, 269
Perfluorosuccinic anhydride
quantum yield dependence on the wavelength in the gas phase photolysis of perfluorosuccinic anhydride, 279
Peroxopolytungstic acid
photoreaction mechanism for amorphous peroxopolytungstic acid as an inorganic photoresist material, 377
Perylenes
triplet energy transfer sensitized fluorescence in 3,9-dibromoperylene, 97
Phospholipids
an investigation of the physical properties of synthetic phospholipid bilayers using a fluorescent quinoline-based probe, 151
Photocatalysis
factors influencing the photocatalytic efficiency of WO_3 particles, 249
Photochromism
photophysics and kinetics of two photochromic indolinospirooxazines and one indolinospironaphthopyran, 63
Photodecarboxylation
photodecarboxylation of citrate through ion pair photochemistry: the $Co(Sep)^{3+}$·$citrate^{n-}$ (n = 1,2,3) system, 195
Photodegradation
a sensitivity analysis of the kinetic mechanism for the photodegradation of a model system of relevance to lignin yellowing, 397
Photoisomerization
photoisomerization of carvone: solvent dependence and evaluation for the photochemical storage of light energy, 259
Photolysis
flash photolysis of mesophenyl-3,4,5,3′,4′,5′-hexamethyldipyrrylmethene, 121
intermediates produced from the room temperature 266 nm laser photolysis of guanines, 219
photolysis of CH_4–NH_3–H_2O mixture: formation of methylamine and ethylenediamine, 53
quantum yield dependence on the wavelength in the gas phase photolysis of perfluorosuccinic anhydride, 279
stationary and pulsed photolysis of hexamethyldisilane, 287
time-resolved laser spectroscopy of the sensitized photolysis of iodonium salts, 317
Photoreduction
selective photoreduction of carbon dioxide to methanol with hydrous cuprous oxide, 369
Photoresists
a positive-type photoresist utilizing photoinitiated introduction of pendent amino groups, 269
photoreaction mechanism for amorphous peroxopolytungstic acid as an inorganic photoresist material, 377
Photostability
quantitative study of the photostability of spiropyrans, 75
Photostabilization
mechanistic aspects of polymer photostabilization, 1
Piperazines
intramolecular excited charge transfer interaction and triplet formation in N^2-aryl-N^1-anthrylmethylpiperazine, 143
Polymers
electron spin resonance studies of photoirradiated poly(methyl methacrylate): effect of wavelength on the formation of radical species, 273
mechanistic aspects of polymer photostabilization, 1
synthesis and exciplex formation of diethyl 2-(9-anthrylmethyl)-2-(*p*-*N*,*N*-dimethylaminobenzyl)-malonate in a polymer matrix, 387
Pulse radiolysis
excited complexes in triethylamine–ethanol at low temperatures: pulse radiolysis study, 325
Pyrans
the photochemical behaviour of 3-(*N*,*N*-dimethylamino)-2*H*-1-benzopyran-2-one in tetrachloromethane: the influence of chloromethanes on quenching of fluorescence, 339

Quenching
the photochemical behaviour of 3-(*N*,*N*-dimethylamino)-2*H*-1-benzopyran-2-one in tetrachloromethane: the influence of chloromethanes on quenching of fluorescence, 339
Quinoline
an investigation of the physical properties of synthetic phospholipid bilayers using a fluorescent quinoline-based probe, 151

Samarium
chemiluminescent reactions of some bromine-containing hydrocarbons with samarium under beam–gas conditions, 41
Self-quenching
re-examination of the photochemistry of anthrone in solution: evidence for highly reactive self-quenching, 203
Sensitivity analysis
a sensitivity analysis of the kinetic mechanism for the photodegradation of a model system of relevance to lignin yellowing, 397
Sepulchrate
photodecarboxylation of citrate through ion pair photochemistry: the $Co(Sep)^{3+}$·$citrate^{n-}$ (n = 1,2,3) system, 195
Singlet oxygen
determination of rate constants of $^1O_2$ consumption by $^1O_2$ acceptors in weakly deactivating solvents, 299
Solvent dependence
photoiomerization of carvone: solvent dependence and evaluation for the photochemical storage of light energy, 259
Spiro compounds
photophysics and kinetics of two photochromic indolinospirooxazines and one indolinospironaphthopyran, 63
quantitative study of the photostability of spiropyrans, 75
Spontaneous emission
dual amplified spontaneous emission from 7-amino-4-methyl coumarin dye, 89
Stilbenes
exciplex formation and behavior in the 9,10-dicyanoanthracene–stilbene system, 109
Sulphuric acid
the interaction between excited β-methylnaphthalene carboxylate and sulphuric acid, 187

Time-resolved laser spectroscopy
time-resolved laser spectroscopy of the sensitized photolysis of iodonium salts, 317
Tungsten
factors influencing the photocatalytic efficiency of WO_3 particles, 249

Water
photolysis of CH_4–NH_3–H_2O mixture: formation of methylamine and ethylenediamine, 53
Wavelength dependence
electron spin resonance studies of photoirradiated poly(methyl methacrylate): effect of wavelength on the formation of radical species, 273
quantum yield dependence on the wavelength in the gas phase photolysis of perfluorosuccinic anhydride, 279
